

How to Purchase RedPanda

Download the Trust wallet app for ios or Android

Why – Trust wallet is a secure crypto wallet to store your tokens. It is not an exchange.

1. Install the Trust Wallet app on your device (not available in desktop format).
2. Import or create a new wallet
3. Create a password
4. Save secret backup/seed phrase in a safe place (handwritten note recommended).
5. Add custom token - copy and paste Redpanda earth contract address into search bar and follow prompts. `< 0x514cdb9cd8a2fb2bdcf7a3b8ddd098caf466e548 >`

Purchase Ethereum

Why? Purchasing Ethereum (ETH) will allow you to purchase RedPanda. We are just using USD to purchase ETH to purchase RedPanda.

1. Go to [Wyre](#) or your preferred exchange platform to convert your FIAT currency into ETH.
2. Enter amount of USD you wish to spend
3. Make sure the transfer is from USD to ETH
4. Authorize Wyre to access your account
5. Click Next
6. Enter payment information
7. Submit
8. Enter verification code
9. Enter bank verification code (log into your bank account to get this code)
10. Once you have purchased ETH, you need to send it to your Trust Wallet Ethereum wallet address (copy address from 'receive' tab in ETH wallet).

Connect Wallet to Uniswap

Why? This will allow you to swap your ETH for Red Panda

Note: Android users should see the DApps browser icon within the app however iOS users will need to go to Uniswap on their device's browser.

1. Go to [Uniswap](#)
2. Click "Use Uniswap"
3. Click "Connect to a wallet"
4. Click "Trust wallet"

How to Purchase RedPanda

5. Follow prompts to connect wallet
6. Click "Select a token"
7. Search for "Red Panda" or paste the official contract address (Make sure you see the RedPanda logo) < 0x514cdb9cd8a2fb2bdcf7a3b8ddd098caf466e548 >
8. Click import, tick box and allow import

How to Purchase RedPanda

Purchase Red Panda

1. Enter amount of ETH to spend on RedPanda in Uniswap (don't spend max).
2. Make sure to leave approx. 5% ETH in your wallet to pay for the transaction/swap.
Every transaction/swap requires a fee in ETH.
3. Set slippage to 5% (Why? The price of a token is constantly moving up and down. Slippage is the range the price can move up or down from current price with the transaction still going through.
4. Click on "No liquidity! Click to trade with V2"
5. Click "Swap"
6. Click "Confirm Swap"
7. Confirm the transaction within the Trust wallet app when the pop-up occurs.
8. Refresh your trust wallet and your tokens will appear in your wallet automatically after a short time.
